Subject: sign offs

The spectrum of alternatives should include for closure of lands proposed for protection in the Citizens' Wilderness Proposal to oil and gas and OHV. (we feel that NWCOS agreed to this as a goal post at an earlier sub committee). This is not consistent throughout the document, and absent for some CWP lands. In most cases closure should be carried forward in Alt C as well as D, but Rick and Reed did not have time to iron out the details for Alt C.

The existing ACECs should be carried forward and analyzed in Alts C and D. Unclear as to why BLM believes these places are any less worthy of protection today.

Jane Y. and Rick H. signed off on these proposals.
